JavaScript

HTML5

CSS3

React

Tailwind CSS

Git

GitHub

VS Code

Notion

Figma

### SOFT SKILLS

---

Communication

Organization

Time-management

Listening

Rapid learning

Adaptable

Flexible

Driven

### PROFILE

---

A love-at-first-sight experience with programming inspired me to pursue a path in software development. Throughout my journey, my passion for technology has only gotten deeper. I believe I have reached a point in my journey where I would benefit immensely from the opportunity to put the knowledge and skills I currently have to the test in real-world settings and grow as a professional.

### EDUCATION

---

JAN 2024 – JUN 2024 Software Development Certificate – CodeSpace Academy

I gained comprehensive coding expertise from CodeSpace Academy's online learning platform. I was fortunate to have studied on-campus where I could rely on my classmates for assistance with understanding concepts, debugging, or general moral-support.

FEB 2021 – MAR 2024 Bachelor of Social Science (BSocSci) – University of Cape Town

During my undergrad I majored in Politics, Economics, and Philosophy. This formative experience nurtured invaluable skills in logical thinking, intellectual curiosity, and the ability to synthesize complex information from diverse sources. In addition, I learned how to manage multiple deadlines while prioritizing my physical, spiritual, and emotional health. These skills have allowed me to excel currently in my journey to becoming a software developer.

### COMMUNITY INVOLVEMENT

---

2024 CodeSpace Student Ambassador (Event Host)

2022 – 2023 Thethani Debating League (Coach and Adjudicator)

2022 – current Rosebank Methodist Church (Member)
