Driven

PROFILE

A recent graduate from the highly acclaimed CodeSpace Academy in Cape Town. I am pursuing my inner passion for tech and web design and would love to be part of a team to gain experience. Eager to prove myself for my debut in the tech industry. Armed with high-demand front-end development skills and soft-skills. Impatient to be useful in a team where my newly acquired skills, clear communication abilities, teamwork, and reliability can contribute to meaningful projects.

EDUCATION

Software Development Certificate ~ CodeSpace Academy

JAN 2024 – JUN 2024

The rigorous syllabus included front-end basics like HTML5, CSS3, JavaScript (ES6) as well as frameworks (React.js, Vue.js, Svelte.js, Tailwind CSS). I was also exposed to version control systems like Git and GitHub, and web-page hosting services like Netlify. During the course I engaged in group activities regularly as well as one-on-one coaching sessions. Each of the skills and languages were taught and examined through projects of various sizes and durations. The coursework also included guidance on laying a good foundation for a software development career.

Bachelor of Social Sciences ~ University of Cape Town

FEB 2021 – DEC 2023

My undergraduate studies were mainly in Politics, Economics, and Philosophy. I gained insight into the complexities of society and the factors that determine political and economic decision-making. The coursework was incredibly intellectually challenging and equipped me with versatile skills that are an asset for a wide range of careers from business, governance, law, and journalism. In general, I received a well-rounded education that taught me flexibility, how to analyze systems, and how to synthesize dense information into useful insight and knowledge.
